Biology

Pacific University · Bachelor

Explore living systems through scientific investigation, laboratory methods and analysis.

BEFORE YOU APPLY

Map the biology, chemistry and mathematics sequences, especially if you are transferring laboratory courses.

TIME, SCHEDULE & APPLICATION

60 major credits; full degree requires more. The published format is in person. Include laboratory attendance and any optional research or fieldwork in your weekly plan.

BUILD YOUR BUDGET

The College of Undergraduate Studies lists $60,100 in tuition and fees for 2026-27. Books, supplies, housing, meals and personal expenses are additional. This is one academic year's published price before financial aid, not the full degree price. Add remaining program and living expenses; compare your cost after confirmed aid.

CREDENTIALS & OUTCOMES

Biology can support laboratory and research-related work. It is not a clinical license; medicine and many specialist research careers require further education.

YOUR NEXT THREE STEPS

1. Review the exact program. Match the award and location to the route you want.
2. Check preparation and timing. Ask for a personal course plan and the next admission steps.
3. Build your full budget. Include required charges, travel and living expenses.
