Biology

University of Oregon · Bachelor

Study biological systems and scientific investigation, with preparation relevant to laboratory work and further education.

BEFORE YOU APPLY

Map chemistry, mathematics and biology prerequisites with an advisor, particularly when transferring a laboratory sequence.

TIME, SCHEDULE & APPLICATION

180 quarter credits. 182 credits in the published BA/BS example degree maps. Confirm prerequisite placement, course availability and transfer credits with an advisor.

BUILD YOUR BUDGET

The 2026-27 resident undergraduate annual budget lists $17,475 in tuition and fees. It excludes the $570 one-time matriculation fee for a new student's first term, books and living expenses. Confirm your tuition-guarantee cohort and course-specific charges; this is not the total degree price. Add remaining program and living expenses; compare your cost after confirmed aid.

CREDENTIALS & OUTCOMES

A biology degree is not a clinical license. Some technical positions are accessible with undergraduate preparation; specialized research or healthcare routes require additional steps.

YOUR NEXT THREE STEPS

1. Review the exact program. Check the award, entry checklist and next start.
2. Build your full budget. Include preparation, supplies and travel.
3. Explore the connected career. Compare duties, Oregon wages and required preparation.
